WINDOW SAMPLER

LENGTH 1 METER*

FRENCH MANUFACTURING

APAGEO EXCLUSIVITY !

PERCUSSION SAMPLING IS MAINLY USED FOR SOFT SOIL. IT ALLOWS TO SEE DIRECTLY THE SAMPLE, IN GENERAL FOR ENVIRONMENTAL INVESTIGATION.

The window samplers are used to get undisturbed samples, without need of any lubricants, thereby allowing chemical analysis on sample.

Manufactured in our own plant, our window samplers are very robust. Extension rods can be connected to the sampler according to the depth sampling.

OUR EQUIPMENT CAN BE ADAPTED TO ANY HAMMERING SYSTEM

Depending on type of soil, depth and size of core wanted, we offer different range of diameters

Thread / Ø outer	7/8 (E)	42 CR	50 CR	60 CR	2"3 / 8R	R32	R38
Ø 32mm							
Ø 42mm							
Ø 50mm							
Ø 60mm							
Ø 63mm							
Ø 85mm							

Other threads and/or length possible (standard : 1m) on request.
